EDUCATION

2011 – 2013

Master Course in Maritime Management, M.Sc.

University of Applied Sciences, Elsfleth

Employment at DNV-GL drawing up the master thesis on the development of a standard process model for the implementation of the Energy Efficiency Certification including the core elements EEDI and SEEMP which became effective from 2013-01-01 on. The thesis comprises customer information, process procedures for internal application as well as flag state authorization, test templates, instruction to surveyors and verifiers as well as training modules related to the new statutory service by taking all affected departments and IT-toolboxes within DNV-GL into account.

2008 – 2011

Bachelor Course Maritime Transport, Navigation and Logistics, B.Sc.

University of Applied Sciences, Flensburg

The bachelor degree has been obtained after research in Namibia. The work abroad focused on the potential of the Port of Walvis Bay as an economic factor by analyzing its infrastructure, operational processes and IT. The thesis contains the development of collaborative management and process procedures as well as a catalogue for the implementation of specific measures to strengthen the ports competitiveness.

2006 – 2008

Apprenticeship as Ship Mechanic

CPO Containerschiffreederei (GmbH & Co.) KG, Hamburg
Qualifying multipurpose rating for deck and engine room services according to STCW.
