

Martin Melzer obtained a Dipl.-Ing. Schiffbau degree from Technical University Hamburg-Harburg (TUHH) in 2008.

He joined Marketing and Design Department of the Peene shipyard and worked during early design phases with all kinds of specialized cargo ships, governmental and research ships. There he also led the design group for Naval Ships after 2010. In 2013 he became part of the Bremen based Lürssen Basic Design department, focussing on Naval Ships and Mega Yachts. At Technolog services he started in 2014. There his interests involve navigation in ice and the integration of LNG as fuel for all kinds of ships.
