

Bart Rombouts

Technical Director, CMB NV

Bart Rombouts, a Master Mariner and Marine Engineer, was appointed Technical Director of the CMB Group in 2015. CMB Group is a private ship owner controlling a diversified fleet container vessels (1400TEU – 5000TEU), dry bulk vessels (Handy Size – Cape Size) and chemical tankers (20k – 30k dwt): Delphis, Bocimar and Bochem.

Bart started his sea-going career in 1992 with Ahlers NV as an apprentice officer and obtained his Master's license in 1999. He also received his engineering degree from the Maritime Institute De Ruyter in Flushing.

In 2004 he joined Delphis NV a new established company specialised in medium size and ice class container ships, where he was responsible for the setup of the technical, new building and operational aspects of the business.

In his current role as Head of the Technical Department at CMB, Mr Rombouts is in charge of an enthusiastic team dealing with technical management, crew management, energy efficiency, new build projects and various other fleet related projects.
